

SUDHANSHU SHEKHAR JHA

Email: jha.sudhanshu1991@gmail.com

Mob: +91 9971194422

Executive Summary

Passionate and technical leader with 9+ years of experience in planning, developing and implementing state of the art highly scalable software products facilitating corporate growth and solving complex problems. Led cross functional teams with diverse technical backgrounds . Adept consensus building, critical thinking , crisis management, problem solving,negotiating and guide team to develop and implement innovative engineering product .I enjoy solving business problems, at the least to pre-empt and eliminate at the highest level

Technical Skills :

Programming Tools: Python, FastAPI, Django, Flask, Nest.js, Kafka, HTML, CSS, Javascript ,Pyramid, GraphQL

Database : PostgreSQL MySQL, MongoDB, ElasticSearch, Redis

Operating System: Linux /macOS/Windows

Code maintenance Tools : Git

Project Management Tools : Jira, Asana, Trello, Youtrack

Cloud : AWS (S3, EC2, Lambda, RDS, ELB, SQS, SNS, Cloudfront, EventBridge)

Work Experience

Dec2025~present JSQ Technologies India Private Limited (Juniper Square) Technical Lead

- Drove the end-to-end project for modernizing a legacy application, utilizing an incremental refactoring strategy and Domain-Driven Design (DDD) to define a scalable, modular architecture.
- Implemented comprehensive application observability, including centralized logging and monitoring, ensuring real-time visibility for troubleshooting and maintaining system robustness.
- Mentored and guided junior developers, ensuring effective work delegation and successful project outcomes.

May2025~Aug2025 Codvo Private Limited Sr Backend Lead II

- Spearheaded the development and deployment of a cutting-edge, scalable speech-to-text service for a key client, powered by advanced large language models (LLMs).
- Architected and deployed high-performance APIs using FastAPI, meeting HIPAA-compliant standards for secure data handling
- Built and optimized a high-throughput data pipeline, enabling low-latency ingestion and processing of large audio datasets.
- Containerized applications using Docker and implemented microservice architecture to improve modularity and reliability.
- Improved deployment consistency by defining coding standards, API contracts, and reusable service components.

Sept2024~May2025 Infinite Computer Solutions India Limited Technical Lead

- Led a 4-member engineering team as Scrum facilitator, driving collaboration, removing blockers, and ensuring on-time delivery of high-quality, scalable software solutions.

- Designed and deployed a serverless architecture leveraging AWS S3 to trigger a Lambda function for data ingestion and AWS EventBridge to schedule and trigger a reporting Lambda for periodic report generation.
- Developed dynamic reports utilizing Pandas, retrieving real-time data from MongoDB to ensure precise and actionable insights, thereby achieving a reduction in manual reporting effort exceeding 80%.
- Implemented email notifications via AWS SNS, automating report distribution and streamlining communication with stakeholders.
- Optimized the solution for scalability, cost efficiency, and operational reliability, ensuring seamless execution of reporting workflows.
- Developed and implemented web scrapers to identify and diagnose video playability issues, ensuring high-quality user experience and minimizing content delivery disruptions
- Collaborated with cross-functional teams to analyze scraper results and implement solutions for content playback optimization.

Mar 2021~Sept2024 Pathfinder Publishing Private Limited(Careers360) Tech Lead Backend

- Led backend development for web applications using Python Django and FastAPI.
- Managed a team of 10 developers, improving delivery velocity and code quality through strong technical mentorship.
- Implemented a feature resulting in increased website traffic.
- Dockerized applications, streamlining deployment processes.
- Designed and optimized SQL queries to enhance database performance.
- Overhauled legacy source code, improving usability and performance by 50%.
- Successfully implemented Kafka to scale our systems, enabling us to process large volumes of data efficiently
- Developed robust API endpoints serving over 100,000 monthly users, contributing to a 15% increase in overall user engagement and integrated
- Developed CI/CD pipelines, ensuring rapid and reliable code deployment
- Integrated AI-driven spam filters into Q&A applications, effectively reducing spam content and enhancing platform integrity.

Apr 2019~Dec2020 Granalyze Technologies Private Limited Software Engineer

- Full-stack engineer building Python/Django applications with React
- Managed AWS infrastructure, improving uptime and ensuring scalable deployments.
- Delivered features that increased website traffic by 40% and user satisfaction.
- Led a team of 20 developers, ensuring robust delivery for multi-module projects.
- Built and maintained high-performance APIs, improving response times and throughput.
- Participated in full Agile Scrum lifecycle and contributed to sprint planning, refinements, and retros.

May 2018~Mar 2019 Big Drop Private Limited Software Engineer

- Full stack developer responsible for end-to-end web app development using python, django , HTML, CSS and Javascript.
- Drove best practice implementation. Decreased rework by 23% and costs by 15%.
- Boosted user experience scores by 55% over company-wide previous best.
- Discuss technical and design issues with other developers, managers, users whenever necessary to achieve best solution
- Participating actively in Agile software development process
- Implement complex solutions with minimal technical debt and easy to deploy as well as bug free

- Developed and maintained high-performance APIs using FastAPI, improving response times and throughput.

Mar 2015 ~Sept 2017

Samsung India Electronics Pvt Ltd

Engineer

- Performed analysis & testing for UHD Smart TVs; contributed to reducing return units by 50%
- Automated repetitive engineering tasks using Python, significantly improving turnaround time.
- Built dashboarding tools using HTML/CSS/JS to enable data-driven decision-making.
- Prepared technical evaluation reports and root-cause analyses for complex field defects.

Certifications:

2015: A- Grade Java programmer NIIT.

2018: Google – (AdWords Mobile, AdWords Display, Mobile Sites)

Achievements :

2015: Recognized for technical analysis report by Samsung Management.

2016 : Best team business award for Q2'2016

2016: Silver award for the best team by Samsung .

2018 : Received client appreciation for timely and efficient project delivery..

2021 : Awarded Shooting Star of the Month for exceptional task execution at Careers360

Education

2010~2014 Bachelor of Technology in Electronics & communication

Institute of Technical Education & Research, Bhubaneswar
